

It's a great American shame that a company with about \$1BILLION in cash can overnight go from not needing any money till 2003 to having to file for bankruptcy(Nov.29,2001)and saying in order to save "the company"shareholders will have to be WIPED OUT.This will help turn us into the kind of market Japan has=NO CONFIDENCE!They are trying to STEAL this company from us COMMON shareholders.My life savings(because i believed what the management said)will be ALL gone.

Thank you for listening
